

Precise Biometrics BioMatch achieves MOSIP compliance for digital identity programs

Precise Biometrics, a global leader in biometric security, access and identity management, today announced that its biometric matching solution, BioMatch, has achieved MOSIP compliance through a collaborative validation process with the [Modular Open Source Identity Platform](#) (MOSIP). This confirms that BioMatch meets MOSIP's requirements for secure and scalable biometric authentication and further strengthens Precise's position in government digital identity programs worldwide.

The validation confirms BioMatch as a trusted solution for modern digital identity ecosystems designed to deliver secure and inclusive identity services. As part of the process, BioMatch has also [been listed in the MOSIP Marketplace](#), making it available to governments, system integrators, and hardware providers within the MOSIP ecosystem.

The achievement builds on Precise's strong and established position within national ID and government identity programs. The company's matching and anti-spoofing technologies are already deployed in Aadhaar-certified solutions through partnerships with leading biometric device manufacturers.

BioMatch combines high-performance, AI-driven biometric matching with biometric data collection, enabling continuous optimization across use cases, diverse users, and environments. The solution also benefits from decades of experience in the mobile industry, where Precise technology is used in billions of biometric authentications every day.

Precise is also engaged in discussions within the MOSIP ecosystem regarding future anti-spoofing and liveness capabilities, an area where the company's BioLive technology has the potential to further strengthen trusted biometric authentication.

Joakim Nydemark, CEO of Precise Biometrics, commented:

"Achieving MOSIP compliance validates the strength of our biometric technology and expands our opportunities within the growing digital identity market for large-scale identity programs. We look forward to supporting MOSIP, its partners, and governments worldwide with interoperable biometric technologies that help build secure and inclusive digital identity ecosystems."

About Precise Biometrics

Precise Biometrics AB (publ) (“Precise”) is a global leader in biometric security and identity management for physical and digital security. The offering includes algorithm products and biometric systems for fingerprint, facial, and palm recognition, along with turnkey solutions for biometric physical access (Precise Access) and visitor management (Precise Visit by EastCoast). The premium solutions enable secure and seamless access to data, mobile devices, premises, and trusted identities.

Precise operates through two business units, Digital Identity and Biometric Technologies, and the company has offices in Sweden (HQ in Lund), the US, South Korea, Taiwan, and China. Precise is a public company listed on Nasdaq Stockholm (PREC). Learn more at www.precisebiometrics.com.
