

Maven Wireless granted a fifth patent in South Korea

Maven Wireless, a market leader of groundbreaking solutions for wireless coverage, has been granted one new patent in South Korea for the patent application "Real-valued passband data transport in DAS"

Maven Wireless provides ground-breaking solutions in wireless coverage all over the world. The company offers a unique and comprehensive DAS system for indoor and tunnel coverage. The solutions are unique, future-proof and supports all relevant technologies from 2G to 5G as well as blue light services. The company has an active strategy for intellectual property rights, including patents, to protect its proprietary technology.

Including the new granted patent, Maven Wireless possesses 69 patents worldwide and has additionally 10 patent applications pending. This new patent protects Maven Wireless digital DAS products and the way how the products transport data over the fibre network.

This patent supports and protects Maven Wireless' business especially in the APAC region.
