

# Enersize receives assignment from Textilia Malmö

**Enersize has been entrusted with conducting an initial compressed air leak detection at one of Textilia's facilities in Malmö, Sweden.**

The assignment involves leak detection at Textilia's Malmö facility and will be carried out using Enersize's proprietary software **LEAQS** – a platform that combines digital traceability, automated reporting, and patented methodology to rapidly identify leaks and generate actionable plans. The combination of technology, methodology, and ease of use makes LEAQS one of the most effective solutions on the market for reducing energy losses in compressed air systems.

"Even though this is a relatively small assignment, we're excited to begin delivering and show what we're capable of," says Fredrik Arrigucci, CEO of Enersize.

The assignment aligns with Enersize's strategy of providing scalable, data-driven solutions for energy efficiency in critical utility systems – and marks another step in the company's growth within Swedish industry.

## About Textilia

Textilia is one of Sweden's leading textile service providers, delivering hygienic and work clothing daily to hospitals, healthcare facilities, hotels, and industrial customers. The company places strong emphasis on sustainability, quality, and energy efficiency throughout its operations.

## About Enersize

---

Enersize develops and provides specialized software, tools, and services for improving energy efficiency in industrial compressed air systems – one of the most energy-intensive processes in manufacturing. The company's technology platform enables detailed monitoring, analysis, and real-time optimization of compressed air systems, with the aim of reducing energy consumption, detecting leaks, and improving operational performance.

Enersize works with a wide range of industrial companies that recognize energy efficiency as a strategic priority – both for improving financial performance and for reducing environmental impact. The solutions are scalable and designed to integrate seamlessly into both existing and new system environments.

The company is listed on Nasdaq Stockholm First North Growth Market under the ticker: ENERS.
