

Precise Expands Its Biometric Physical Access Offering for High-Security Sectors

Precise Biometrics, a global pioneer in cybersecurity and biometric technology, is expanding its biometric physical access offering to even better serve high-security sectors amid today's evolving security challenges. While Precise has long provided biometric access solutions for commercial buildings, including high-security environments, the company is now introducing a fully on-premises solution – complementing its existing hybrid cloud-based offering. This enables organizations with stringent security requirements for physical access to deploy the solution on restricted networks, ensuring complete control over their security infrastructure.

This expanded offering reinforces Precise Biometrics' commitment to delivering flexible and secure biometric access control solutions, supporting both facial recognition and palm authentication, tailored to industry-specific needs. With a fully on-premises deployment, the company addresses the escalating security demands placed on high-security organizations in today's increasingly uncertain security landscape – Including government agencies, critical infrastructure facilities, defense organizations, and other industries where compliance and security are paramount.

Joakim Nydemark, CEO of Precise Biometrics, comments:

"With today's security climate and the rapid advancement of AI fueling cyber threats, the demand for robust physical security solutions is greater than ever. We are proud to expand our biometric access portfolio with a fully on-premises offering, ensuring that organizations in high-security sectors can deploy our technology with the highest level of control – meeting their strict security and compliance requirements without compromise."

About Us

Precise Biometrics AB (publ) (“Precise”), is a global pioneer in biometrics and cybersecurity. The biometric recognition solution suite today includes fingerprint, face, and palm recognition algorithm products along with turnkey solutions for visitor management (YOUNiQ Visit by EastCoast) and biometric access management (YOUNiQ Access).

Precise’s premium biometric recognition solutions is used in mobiles, laptops, security tokens and smart locks, as well as automotive applications for in-car payments, driver authentication, and personalized settings and access. Precise also offer visitor management and physical biometric access control solutions.

Precise operates through two business units, Digital Identity and Biometric Technologies, and the company has offices in Lund (HQ) and Stockholm, Sweden, Potsdam NY, USA, Seoul, South Korea, Taipei, Taiwan, and Shanghai, China. Precise is a public company with shares listed on Nasdaq Stockholm (PREC). Learn more at www.precisebiometrics.com.
