## Ovzon participates in major initiative on future mobile communication solutions

Ovzon, together with a range of other leading companies, authorities, and organizations, will participate in a major initiative focusing on mobile communication solutions expected to be in use during the 2030s. The Swedish Foundation for Strategic Research (SSF) is investing 60 MSEK in the project SMART 6GSAT (Sustainable Mobile Autonomous and Resilient 6G SatCom), with KTH as the coordinator and project leader.

The aim is to integrate traditional land-based mobile communication with satellite communication in 6G. The vision is for mobile communication services to be seamlessly accessible to anyone with a 6G device, anywhere and anytime.

In addition to Ovzon, the industry consortium includes companies like Ericsson, Saab, Swedish Space Corporation (SSC), Eutelsat-OneWeb, Airbus, and Viasat, as well as authorities such as the Swedish Post and Telecom Authority (PTS) and the European Incoherent Scatter Scientific Association (EISCAT).

The project started January 1, 2025. Read more about the project [here](#).

### About Ovzon

Ovzon offers world-leading integrated mobile satellite communications services, SATCOM-as-a-Service, to customers globally. The services combine high throughput satellite networks, mobile satellite terminals, gateway services, and dedicated customer support. Ovzon's offerings meet the growing demand for mission critical connectivity for customers with high performance, mobility and resiliency requirements such as Defense, National security and Public safety. On July 5, 2024, commercial service commenced on Ovzon's proprietary developed geostationary satellite Ovzon 3. Ovzon has offices in Stockholm, Sweden as well as Herndon, VA and Tampa, FL in the USA. Ovzon is listed on Nasdaq Stockholm Small Cap. For more information, visit [www.ovzon.com](http://www.ovzon.com).
