

## **Danish port engineering consultancy A1 Consult joins XPartners**

**XPartners is expanding its Danish platform within infrastructure and welcomes A1 Consult to the group. The company adds deep specialist expertise in port and marine engineering, coastal protection and climate adaptation, and strengthens XPartners' position within marine and civil engineering in Denmark.**

A1 Consult was founded in 2007 and is headquartered in Randers. The company specialises in ports, coastal protection, climate adaptation, infrastructure and utilities, and provides technical advisory across all project phases, from feasibility studies and design through permitting, construction management and operational follow-up. Clients include public authorities, municipalities, industrial ports and contractors across Denmark. The company employs around twenty people.

"A1 Consult has built a well-regarded position in a segment where technical depth and long experience are decisive. Their expertise complements our Danish platform in a concrete way and strengthens our overall offering within infrastructure. We see good opportunities for collaboration with other companies in the group and look forward to welcoming A1 to XPartners," says **Rasmus Ødum**, Managing Director of XPartners Denmark.

The company works on complex civil and marine engineering projects and has solid experience from assignments in port environments and along the Danish coastline.

"We have worked in ports and marine engineering since 2007 and know what it takes in that type of assignment. Becoming part of XPartners gives us access to a broader network and better conditions to take on more complex projects, without losing what makes A1 who we are: a strong culture, specialist technical expertise and a firm focus on delivery," says **Ulrik Max Jørgensen**, CEO of A1 Consult.

### **About A1 Consult**
