

Regulatory Filing for Teduglutide

Newbury has through one of its partners initiated a DCP filing for Teduglutide on Day-1 following the expiry of Data Exclusivity.

Teduglutide has been developed for the treatment of short bowel syndrome (SBS), a rare condition that impairs the small intestine's ability to properly absorb nutrients and fluids.

This submission presents a first-to-market opportunity for Newbury, emphasizing our commitment to addressing unmet medical needs in the rare disease segment. Launch is anticipated to take place in 2026.

Teduglutide achieved a turnover of approximately 10 M€ in the Nordics during the past 12 months, according to DLMI (MAT August 2024).
