

Careium wins major 12-year Norwegian contract in collaboration with partners

Careium, the European leader in technology enabled care, shall deliver services and products to the municipalities of Asker and Baerum in Norway. Careium cooperates with partners Sensio and Atea that acts as the bid leader.

The contract features hardware, software and service delivery coupled with collaborative development of technology enabled care for the coming twelve years. Careium will manage the main service delivery and the contract component is estimated to be valued at approximately SEK 24 million per year. Delivery will commence in October 2025.

“We are immensely proud, together with our partners, to serve Asker and Baerum for the upcoming twelve years with a substantial service delivery ensuring rich, safe and active lives for thousands of seniors. Norway stands out as one of the most sophisticated, digitally advanced, and quality centric technology enabled care markets in Europe, and we are proud to now be a part of servicing the two biggest contracts in the country”, says Christian Walén, President and CEO at Careium.
