

FRISQ SIGNS AGREEMENT WITH VÄSTRA GÖTALANDSREGIONEN

FRISQ has signed a development, maintenance and support agreement with Västra Götalandsregionen (VGR) to govern the use of FRISQ Care following completion of pilot projects in the region.

FRISQ is currently, in cooperation with ATEA, running two FRISQ Care based pilot projects in VGR – at the Sahlgrenska University Hospital COPD center and at Södra Älvsborg Hospital's infection unit. A development, maintenance and support agreement has now been signed to enable the continued use of FRISQ Care upon completion of these pilot projects. The agreement further stipulates the terms and conditions governing if and when additional healthcare units in VGR can order and start using FRISQ Care.
