

Acconeer's Pulsed Coherent Radar sensors now fully certified according to new US regulations

As of today, Acconeer's A121 and A111 Pulsed Coherent Radar sensors are certified as compliant with the new rules for the 60GHz frequency band in the USA. The compliance has been verified by Cetecom advanced following the recent adoption of the new regulations.

CEO Lars Lindell comments: "This is an expected yet very important step for us and our customers on the American market, since it simplifies the launch of new products in the US significantly. As previously communicated, we are ramping up our sales activities in USA, and we look forward to seeing an uptake in activity and hopefully sales in the region."

The grant is a modular approval including the use of lenses. This will reduce the cost of certification and time to market for Acconeer's customers.

About Acconeer AB

With ground-breaking technology, Acconeer has developed a radar sensor that opens a new world of interaction. Acconeer Micro Radar Sensor, with low power consumption, high precision, small size and high robustness, is a 60GHz robust and cost-effective sensor for detection, distance measurement, motion detection and camera-supported applications with low power consumption. Acconeer combines the advantage of low power consumption with highly accurate pulsed radar systems of coherent radar, all integrated into a component with a surface area of only 28 mm². The radar sensor can be included in a range of mobile consumer products, from smartphones to wearables, but also in areas such as robots, drones, the Internet of Things, healthcare, automotive, industrial robots and security and monitoring systems. Acconeer is a semiconductor company and, as a business model, sells hardware to manufacturers of consumer electronics products. Acconeer is listed on Nasdaq First North Growth Market with the ticker code ACCON, Redeye is the company's Certified Advisor (CA). For more information: www.acconeer.com.
