

Maven Wireless granted a fourth patent in Japan

Maven Wireless, a market leader of groundbreaking solutions in wireless coverage, has been granted a fourth patent in Japan

Maven Wireless provides ground-breaking solutions in wireless coverage all over the world. The company offers a unique and comprehensive DAS system for indoor and tunnel coverage. The solutions are unique and future-proof and supports all relevant technologies from 2G to 5G as well as blue light services. The company has an active strategy for intellectual property rights, including patents, to protect its proprietary products.

Including the new granted patent, Maven Wireless possesses 56 patents worldwide and has additionally 15 patent applications pending. The new patent in Japan covers key elements on how to distribute high speed data on the fronthaul fibre links to the radio remotes in a Distributed Antenna System (DAS). This patent support and protects Maven Wireless' business globally.
