IDEX partner to roll out IDEX Access biometric cards at healthcare provider in Japan

IDEX Biometrics ASA (OSE: IDEX) announces that a Japanese healthcare provider has selected IDEX Access biometric cards for a rollout to its staff, following a successful evaluation at the customer's site.

The order has been placed with one of IDEX's leading partners in Japan and will be delivered from the partner's existing inventory of IDEX Access cards, marking the move from partner purchase to end-customer deployment.

About Us
*IDEX Biometrics ASA (OSE: IDEX) develops and makes fingerprint **biometric cards for access control**, digital identity and payment. By authenticating identity through fingerprint biometrics rather than passwords, PINs or traditional credentials, IDEX enables secure and convenient access to physical and digital services. Fingerprint matching happens directly on the card, offline and without transmitting biometric data. Certified by Visa, Mastercard, FIDO2 and EAL6+, and backed by more than 250 patents and over USD 350 million invested in R&D, IDEX serves banks, enterprises and public sector organizations directly and through channel partners worldwide.*
