oodash Group signs a customer agreement with Medic Connect regarding AI services

oodash Group AB (publ) ("OODA AI" or "the Company") has signed a customer agreement ("the Agreement") with Medic Connect GmbH ("Medic Connect"), a leading personnel service provider in the healthcare sector. Under the Agreement, OODA AI will receive 50% of the result generated from increased net earnings, cost savings, or efficiency gains directly tied to the implementation of its AI services. The initial term is 36 months, with automatic 12-month extensions.

The AI-services consist of adaptation and licensing of applications from OODA AI as well as AI computing through the OODA AI's proprietary decentralized AI computational Network. Through this agreement, OODA AI will provide Medic Connect with, among other things, access to its AI-powered business intelligence platform "oodash" as well as a secure, GDPR-compliant internal AI enterprise chat solution. These technologies will enable Medic Connect to efficiently integrate and analyze their own data sources and interact dynamically with their data via AI-driven chat functionality.

About Medic Connect
Medic Connect is a trusted and steadily expanding healthcare staffing agency, specializing in the placement of highly qualified physicians with respected hospitals and clinics across Germany. With a clear understanding of the demands in the healthcare sector, Medic Connect provides targeted staffing solutions that ensure smooth operations and high-quality medical care. Currently, Medic Connect serves 30 clinics and hospitals across Germany, deploying an employee network of over 420 specialized physicians across all medical disciplines.

Arli Mujkic, CEO at OODA AI, comments:
"The healthcare sector demands precision, speed, and trust — all qualities that align perfectly with AI when applied responsibly. Partnering with Medic Connect allows us to bring intelligent automation and data-driven insights to a critical industry where every efficiency gained can have a meaningful human impact. We're proud to support their mission with technology that empowers people, not replaces them."
