

ScheduALL announces Evolution, the latest SaaS solution

New software solution for production and broadcast resource management and crewing

Stockholm, Sweden – ScheduALL®, part of Net Insight, announces the release of the new SaaS solution ScheduALL Evolution for resource management and crewing, enabling facilities managers and scheduling supervisors to manage projects anytime, anywhere with a sleek mobile solution and a new, modern interface.

ScheduALL Evolution helps its broadcast and production customers avoid cost overruns, missed deadlines, and high-priced, poor-quality services by providing enterprise resource optimization software that drives customer success, delivering efficiency, security and unmatched service in leading-edge, cloud-based solutions.

ScheduALL Evolution offers the following benefits:

- The latest technology – take advantage of cloud hosting, mobile access and advanced business analytics
- Access to projects anytime and anywhere with a user interface re-engineered for mobile devices
- Drag and drop functionality for crewing, event management and scheduling - quickly and easily connect teams and assets to jobs
- World-class service and support
- Peace of mind with robust security in a cloud-based environment
- Reduced or eliminated need for a costly IT infrastructure, as well as costs for hardware, maintenance and upgrades
- Improved ROI

Users can also integrate the cloud-based Business Intelligence (BI) into both the ScheduALL v5 server version and the new ScheduALL Evolution platform to increase the depth of available analytics. This means that along with the new SaaS platform, users of ScheduALL v5 can also take advantage of advanced BI with their current systems. ScheduALL Services are available to assist both with Business Intelligence with migration planning for ScheduALL Evolution.

“[ScheduALL](#) provides enterprise resource management (ERM) software and service solutions to more than 300 customers in 50 countries. Our business processes and methods have become the industry standard for workflow and resource management,” says Ken Graham, VP Resource Optimization at Net Insight. “With the launch of ScheduALL Evolution, we bring the next generation cloud-based SaaS solution to our customers.”
