

Ortivirus is awarded a strategically important contract on prehospital patient monitoring to Region Sörmland

Ortivirus has been awarded a contract for the delivery of equipment to Region Sörmlands's ambulance operations. The contract applies to the delivery of Ortivirus' solutions MobiMed Monitor for patient monitoring and MobiMed Life, external defibrillators, to the region's emergency vehicles. The delivery value is estimated to 10.0 MSEK. The contract duration is 2 years with a potential extension of 1+1 years.

Region Sörmland, which has previously used MobiMed in its multi-patient transport ambulances, has now chosen to award Ortivirus a contract for the delivery of new equipment for its prehospital care. The contract includes MobiMed Monitor hardware and software, as well as telemedicine solutions and integrations. Additionally, the contract encompasses MobiMed Life and external defibrillators from Bexen Cardio, for which Ortivirus holds exclusive distribution rights in the Nordic countries, the UK, and Ireland.

"We are extremely pleased that Region Sörmland has chosen to award Ortivirus this contract and that the region has decided to expand its existing installation of MobiMed. This award once again demonstrates that our solutions are in complete alignment with the needs of modern ambulance care."
says Stefan Ekblom, Sales Manager Nordic at Ortivirus.

The contract will be signed after a period of 10 days from the date of the award, in accordance with the procurement regulations.

About Ortivus

Ortivus develops and commercialises MobiMed, e-health and medical technology solutions for a safer and more efficient healthcare. The company was founded in 1985 and is today a leading provider of mobile digital solutions for prehospital care, worldwide. Ortivus' innovations are based on in-depth expertise in cardiology as well as decades of development together with users and customers. The company's headquarters are located in Danderyd, Stockholm. The company has, since 1998, a wholly owned subsidiary based in the United Kingdom and since 2022, a wholly owned subsidiary based in Denmark.

MobiMed is a modular platform that connects and enable real-time information sharing throughout the prehospital care chain. It is currently used by over 12,000 paramedics in over 2,700 emergency vehicles. The platform, MobiMed, consists of several product modules that are completely integrated but can also be used stand-alone. MobiMed comprises four main solutions: MobiMed Monitor, that measures, monitors and shares patients' vital parameters and ECG in real-time, MobiMed ePR, - an electronic patient record for decision support, collection of patient data and clinical documentation, MobiMed enRoute, - a tool for navigation and case management, and MobiMed Life - a range of stand-alone defibrillators.

MobiMed saves vital seconds and enable healthcare professionals make the right decisions in critical situations. MobiMed also contributes to improved quality of care and saved resources.

Ortivus Class A and Class B shares are listed on the NASDAQ Stockholm Small Cap list.
