

OPTICEPT RECEIVES ORDER FOR CEPT® SYSTEM FOR OLIVE OIL EXTRACTION FROM SPANISH PRODUCER

OptiCept Technologies has received an order for the company's patented OPTICEPT®-LO7 system for olive oil extraction from an established producer based in Andalusia, Spain. Delivery and installation are planned ahead of the 2025 harvest season.

The order concerns a CEPT® system specifically developed to optimize yield and quality in olive oil extraction using PEF (Pulsed Electric Field) technology.

"We are seeing increased interest from olive oil producers in Spain and Portugal, where our CEPT® technology is gaining ground as a new industry standard. Earning the trust of a producer with nearly 100 years of experience is a strong testament to the potential of our technology," says Thomas Lundqvist, CEO of OptiCept Technologies.

The customer has been producing olive oil since 1926 and operates in Andalusia, Spain's largest olive oil-producing region. Spain accounts for around 40% of the world's olive oil production, and Andalusia is home to nearly half of the country's more than 1,800 olive oil companies.

Additional information on market size and growth potential can be found in OptiCept's latest market analysis, *OPTINSIGHTS OLIVE OIL*, available here:

About Us

OptiCept Technologies AB (publ) provides the food and plant industry with technological solutions that contribute to a more sustainable world and enable climate-smart economic growth. OptiCept optimizes biological processes - Increased extraction from raw material, extended shelf life, reduced waste, and improved quality (taste, aroma, color, nutritional content) of the final product.

The positive effects of technology increase efficiency for our customers, provide better products for the consumers, and minimal impact on our environment. Through patented technology in PEF (pulsed electric field) and VI (Vacuum Infusion), the technology opens up new business opportunities for the food and plant industry worldwide. OptiCept's vision is to contribute to a sustainable world by offering efficient, green, cutting-edge technology that is easy to use in the areas of FoodTech and PlantTech.

The company is located in Lund and the share is traded on the Nasdaq First North Growth Market (ticker: OPTI). The Company's Certified Adviser is DNB Carnegie Investment Bank AB.
