BLINCVISION PARTICIPATES IN PRESS VISIT TO SAAB

BlincVision AB is participating today in a press visit to Saab in Karlskoga, Sweden. The event is part of a press tour, organised by the Permanent Representation of Sweden to NATO, with the aim of giving international journalists insight into the Swedish defence industry and how cooperation between different stakeholders is an important part of the Swedish model.

During the press visit, Saab is showcasing parts of its operations in Karlskoga, focusing on both existing and new capabilities. Part of the presentation highlights how Saab involves smaller technology companies in developing new concepts to efficiently explore new opportunities and evaluate technical solutions. By working with different stakeholders, Saab can make use of new technologies from outside the defence sector and accelerate the development of future solutions.

“It is a great pleasure to be part of this event and to demonstrate how our technology can contribute to the defence sector. It is a privilege to be part of Sweden’s defence innovation ecosystem. Collaboration between large and small companies is essential to accelerating progress,” says Markus Johansson, CEO of BlincVision.
