

SynAct Pharma to Participate in Nordic Life Science Days 2025

SynAct Pharma AB (publ) ("SynAct") (Nasdaq Stockholm: SYNACT), a clinical-stage biotechnological company focused on treating inflammation through resolution therapy, announced today the company will participate at the Nordic Life Science Days (NLS-Days) on October 13-14, 2025, in Gothenburg, Sweden.

"Nordic Life Science Days is an important platform for engaging with potential partners and investors, and we are excited to engage in discussion on SynAct's progress and path forward. Our lead program, resomelagon, currently in Phase 2b development, is being investigated in clinical studies in autoimmune diseases and as a host-directed treatment to control hyperinflammatory responses in viral infections. Our most progressed program, Phase 2b study in rheumatoid arthritis, is advancing well and aims to prove the concept of resolution therapy as a new approach to treat patients early with high disease activity. We look forward to meaningful discussions with partners and investors at NLS-Days," said SynAct Pharma's Chief Business Officer Mads Liebach Bjerregaard.

To schedule a meeting with SynAct Pharma register at: <https://nlsdays.com/partnering/>.

The Nordic Life Science Days is an event for Nordic life science with delegates from biotech, medtech, finance and research sectors. Over 1,500 delegates from the Nordics and internationally join with more than 3,000 partnering meetings held over two days.
