

FT Lists Polarium Among the Fastest-Growing Companies in Europe – for the Third Consecutive Year

With a compound annual growth rate (CAGR) of 68.1 percent between 2018 and 2021, Polarium has – for the third year in a row – been recognized as one of the fastest-growing companies in Europe by the Financial Times' annual FT1000 ranking.

Since its founding in 2015, Polarium has been on a mission to unlock endless energy by developing safe, smart and sustainable energy storage solutions built on lithium-ion battery technology. Owing to a strong customer focus and best-in-class products, Polarium has delivered exceptional sales growth since the beginning – with installations on more than 75 markets across all continents.

Leveraging a market-leading position within reserve power, Polarium has become a leading energy storage developer for businesses within telecom, commercial and industrial facilities across the world. By combining cutting-edge and easily adaptable modular batteries with intelligent software and smart services, Polarium's energy storage solutions maximize the potential of solar and wind installations by making renewable energy a dispatchable asset, ultimately increasing its customers' energy efficiency.

"We're honored to be recognized by the Financial Times for a third year in a row. We're on an incredible journey together with our employees, partners and customers, but we're just getting started, I look forward to continued expansion and international growth on our path to become the leading sustainable, fully integrated energy solutions provider," says Stefan Jansson, CEO of Polarium.

The FT1000 ranks companies that achieved the highest compound annual growth rate (CAGR) in revenue between 2018 and 2021. The FT1000 ranking was published on 01 March and will also appear in the Financial Times' newspaper on 21 March 2023. See the full list [here](#).

About Polarium

Polarium is a leading energy storage developer. We make energy storage and optimization solutions built on lithium-ion battery technology for businesses within telecom, commercial and industrial facilities across the world. Polarium was founded in 2015 on the conviction that safe, smart and sustainable energy storage solutions will be key to empower the transition to a truly, sustainable energy future. We are an impact

business contributing to the sustainable energy transformation by enabling renewables, electrification and intermittent power supply.

Our cutting-edge and easily adaptable modular battery technology enables us to be in the forefront of developing state-of-the art sustainable energy storage and optimization solutions for today - and tomorrow. Polarium is a fast growing, profitable entrepreneurial company headquartered in Stockholm, with production in Mexico, South Africa and Vietnam, customers across the world from Ghana to Svalbard and 600+ employees.
