#### **About Momentum**

Momentum is a SaaS company that develops, sells and implements cloud-based systems for property management and energy monitoring in Sweden. In property management, the Company offers the platform Momentum Property, which is a comprehensive system for property owners and property managers with support for, among other things, contract and rental administration, marketing and leasing, inspection and fault reporting. In addition, the My Pages interface is included with extensive functionality aimed to the property owner's customer, the tenant. Via Momentum Energy, Momentum offers a platform for collecting, processing, and analyzing energy data.

Momentum generates revenue via both subscription agreements and service revenue. Momentum uses its own resources for product development, implementation, support, sales and marketing. The company's head office is located in Stockholm, but there are also offices in Falun and Malmö.

Momentum's customers consist of property owners and property managers in Sweden. In 2020, Momentum had approximately 10,000 users at the real estate companies and more than one million tenants and housing applicants who used Momentum's solutions. In 2020, rental notices amounting to more than SEK 20 billion were created in Momentum Property, and more than 100 million square meters of living space were managed in Momentum's products.

In 2016, Momentum began a transition from customized, locally operated software ("On-premise") to modern standardized SaaS solutions. These are developed based on best practice, i.e. analyzes Momentum has made based on experience and feedback from customers. The transition, which is still ongoing, has been successful and has meant, among other things, that the Contracted Annual Recurring Revenue ("CARR[2]"), has

grown at an annual rate of 19.1 percent during the period 31 December 2018 - 30 September 2021. On a rolling 12-month basis, the Company's revenue per 30 September 2021 amounted to SEK 91.7 million and EBITDA amounted to SEK 30.9 million. At the same time, CARR amounted to SEK 73.8 million.

### **Stabilisation measures**

SEB may, in its role as stabilisation manager, in connection with the Offer, conduct transactions in order to maintain the market price for the shares at a level above that which might otherwise prevail in the open market. Such stabilisation transactions may be carried out on Nasdaq First North Growth Market, in the OTC market or otherwise, at any time during the period starting on the date of commencement of trading in the shares on Nasdaq First North Growth Market and ending not later than 30 calendar days thereafter. However, SEB has no obligation to undertake any stabilisation measures and there is no assurance that stabilisation measures will be undertaken. Under no circumstances will transactions be conducted at a price higher than the one set in the Offer.

The Over-Allotment Option may be utilised to over-allot shares in order to facilitate any stabilisation transaction. The stabilisation transactions, if conducted, may be discontinued at any time without prior notice but must be discontinued no later than within the aforementioned 30-day period. SEB must, no later than by the end of the seventh trading day after stabilisation transactions have been undertaken, in accordance with article 5(4) of the Market Abuse Regulation (EU) 596/2014 and the Commission Delegated Regulation (EU) 2016/1052, disclose that stabilisation measures have been undertaken. Within one week of the end of the stabilisation period, SEB will disclose whether or not stabilisation measures were undertaken, the date on which stabilisation started, the date on which stabilisation was last carried out as well as the price range within which stabilisation was carried out for each of the dates when stabilisation measures were conducted.
