Silex Microsystems receives support from Pennsylvania for its U.S. establishment

Silex Microsystems was welcomed to Mountain Top, Pennsylvania, at an event on 16 November 2026 with Pennsylvania Department of Community & Economic Development, Secretary Rick Siger. In connection with the event, Pennsylvania Governor Josh Shapiro announced that the state supports Silex's establishment by providing a USD 5 million loan, a USD 490,000 grant and tax credits of up to USD 265,000.

Edvard Kälvesten, President and CEO of Silex Microsystems, comments:
"We are grateful for the warm welcome we have received in Mountain Top, Pennsylvania. Establishing manufacturing capacity in the United States is an important step in our growth strategy and brings us closer to our U.S. customers. It shortens lead times and opens up opportunities for us to work with customers in new industries. Pennsylvania has a proud industrial heritage, deep engineering expertise and a skilled workforce, and we are grateful for the state's support as we convert the semiconductor fab into a MEMS facility."

Rick Siger, Secretary of the Pennsylvania Department of Community & Economic Development, comments:
"We are proud to welcome Silex to Mountain Top. Silex decision to establish its U.S. manufacturing capacity here in Pennsylvania is a strong vote of confidence in our state. This investment brings world-class MEMS technology and expertise to the Commonwealth, further strengthens our manufacturing industry and its important role for our workforce and economy, and creates new opportunities for Pennsylvanians. We look forward to supporting Silex as it grows here."

As previously announced on July 7, 2026, Silex has entered into a definitive agreement to acquire a 200 mm semiconductor fab in Mountain Top, Pennsylvania, from Onsemi. Silex will convert the fab into a MEMS facility. Establishing local manufacturing capacity in the United States is an important part of Silex's long-term growth strategy. Many of Silex's largest customers are based in the United States, and local manufacturing capacity enables faster response times and closer customer integration.

About Silex Microsystems
Silex Microsystems is the world's leading pure-play MEMS foundry. The company develops and manufactures advanced microelectromechanical systems (MEMS) on behalf of its customers, integrating mechanical and electronic components to enable high-precision sensing, control, photonics and motion applications. Its customer base includes leading global technology companies, with MEMS used across a wide range of applications, including medical technology,

cloud infrastructure and autonomous vehicles. Silex Microsystems was founded in Sweden in 2000 and today has more than 500 employees. The company's headquarters and manufacturing facility are located in Järfälla, Stockholm. Silex Microsystems is listed on Nasdaq Stockholm under the ticker SILEX.
