

# Dataproces Expands Cooperation with German Municipality

**Dataproces has today announced two new agreements, including an expansion with an existing municipality in Germany.**

The German agreement concerns the delivery of additional advisory services and has been entered into as an extension of the existing cooperation between the parties. It includes assistance related to the customer's use of Dataproces' solutions. Dataproces views the agreement as a positive confirmation of the value of the company's solutions and the ongoing cooperation with international customers, where the German market plays a central role in the company's expansion plans.

In addition, Dataproces has entered into a contract with a large municipality in Jutland concerning data analysis. These services are targeted at municipalities' need to ensure a solid and accurate data foundation and are only announced when the expected fee exceeds DKK 250,000.

Dataproces has now announced a total of 26 new contracts in 2026, including data analysis and SaaS contracts. March was particularly busy, with 11 new contracts announced, while 6 contracts were announced in April and a further 2 contracts have now been announced in May.

Dataproces has a non-calendar financial year, and the company is expected to present its annual report on 18 June 2026.
