# Resilient result in a tough market

#### Second quarter

Operational earnings for the quarter amounted to SEK 348 M, with a margin of 3.3 per cent. The Service Business accounted for 64 per cent of the result, amounting to SEK 252 M with a margin of 10.4 per cent. The Car Business reported a result of SEK 136 M. Order intake was at a higher level than the previous year.

Operating cash flow was stable at SEK 188 M for the quarter. The ratio of net debt to EBITDA was 1.6 times compared with 1.7 times at the end of the year.

# Acquisitions for sustainable growth

We continue to grow through strategic acquisitions in attractive areas, and have welcomed almost 50 new businesses to the Bilia family over the past decade. Our acquisition strategy is based on clear and well-established processes from start to finish.

We work daily to develop our acquired operations by strengthening our customer offering and focusing on operational efficiency. Integrating acquired operations is extremely important, and it is only when a new operation has been effectively woven into our existing structure, ways of working and culture that we can realise synergies.

This combination of growth through acquisitions and continuous improvement

in our day-to-day operations puts us in a strong position in a rapidly changing market.

# Expansion with Volvo Trucks with no increase in debt

We have changed our truck brand from Mercedes-Benz to Volvo by divesting our Mercedes-Benz truck operations during the second guarter, to take over the operations of Tage Rejmes Lastvagnar AB and Tage Reimes i Örebro Lastvagnar AB on 1 July. These companies' operations consist of sales and servicing plus related services for trucks under the Volvo Trucks brand. Operations are conducted at nine facilities in central Sweden, and the companies jointly have a market share in Sweden of approximately 10 per cent. We firmly believe in Volvo Trucks, which is a leading player in the Swedish market. Servicing is a major aspect of the truck business, as customers have to be able to rest assured that their trucks are always in full operation.

As part of the financing of the acquisition of these truck businesses, we divested six properties in Sweden on 3 July where we conduct operations for the Porsche, BMW and Toyota car brands. Divesting the properties enables our expansion with Volvo Trucks without increasing our debt.

# Pent-up demand points to brighter times ahead

The Service Business's result was resilient and represented a significant share of Bilia's operational earnings in the second quarter. Profitability from sales of used cars remained at a good level during the quarter, although there was price pressure in the market for electric cars in Sweden.

Order intake was 13 per cent higher than previous year, with a positive development foremost at the end of the quarter. As in the past years, private individuals particularly in Sweden and Western Europe, have been cautious about ordering new cars, which is why order intake remained at a relatively low level in historical terms. In Norway, however, new car orders were stronger, with continued high demand also among private individuals.

We can see signs of increased activity among private customers in Sweden, and combined with expectations of a gradually brighter economic outlook, we are cautiously optimistic about the demand for cars during the rest of 2025. There is also a pent-up demand for new cars, which could contribute to a more sustained recovery in the longer term as economic conditions improve.

**Per Avander** Managing Director and CEO

The order intake was 13 percent higher compared to the previous year, and combined with pent-up demand for cars, this points to a more positive outlook going forward"

We offer services for everything related to car ownership during the car's entire life cycle, from the purchase of a new car to recycling parts from a dismantled car.

# A sustainable growth strategy

We aim to generate annual growth above 5 per cent over a business cycle. Average growth over the past five years has been 6 per cent, and between 2012 and 2024 our turnover has more than doubled from SEK 17.7 Bn to SEK 39.2 Bn, while the number of employees has increased almost 50 per cent. During the period, we grew as much organically as through acquisitions.

#### Growth in existing businesses

Our ongoing efforts to improve and develop the existing business ensure that we can grow organically in the best

way possible, while maintaining or improving profitability. We are continuing to work on our MobiliaCare operational area, which focuses on products and services that are common to all car brands.

### Growth through acquisitions

Bilia has a broad and well-established position as regards car brands, service business and geographical presence. Over the past decade we have made some 50 acquisitions, which has entailed expansion into new countries, new car brands and new service areas. In light of the ongoing consolidation in the industry, we see good opportunities to create continued growth through acquisitions in areas of strategic importance to us. We want to grow in Sweden, Norway, Luxembourg and Belgium, but other European countries may also be of interest should the right opportunity arise. Our aim is also to grow the Service Business by making acquisitions in existing and new areas of operation. Well-planned, strategically suitable acquisitions contribute to organic growth through our focus on efficiency and improvement, especially within the Service Business.

### Second guarter 2025

During the guarter, sales in the Service Business declined organically by just under 1 per cent. This was attributable to Sweden, where sales declined organically by 3 per cent. In Norway and Western Europe, organic growth remained good at 4 and 6 per cent respectively. The negative organic growth in Sweden was mainly attributable to our damage and repair centres, but growth was also affected by lower new car sales in recent years. The organic growth is adjusted for acquired and divested operations, exchange rate fluctuations, and the number of working days compared to the previous year.

During the guarter, there was one fewer working day in Sweden and Norway, two fewer working days in Luxe Belgi

Our target is to grow the turnover and profitability of our Service Business. Since 2014 the turnover for the year has more than doubled, while the operational earnings has more than tripled. The margin has during the same period increased from 8.5 per cent to 11.4 per cent. The lower margin compared to previous years is primarily explained by somewhat lower profitability in new operations, which includes both acquired operations and newly started operations.

Demand in the Service Business is impacted by the weak new car sales in recent years. In 2024, the Swedish

total market for new cars was almost 20 per cent lower compared to the average for the past ten years. The market is now considered to have reached its bottom level and a gradual recovery is expected going forward.

We work continuously to improve the profitability of our Service Business. Our Business Excellence team together with our team within the Service Business identify the most effective processes and then implements these at the facilities where there is improvement potential as well as at our newly started and newly acquired businesses. ### Second quarter 2025

The Car Business's **deliveries of new cars**, adjusted for acquired and divested operations, were 11 per cent higher during the quarter compared with the previous year. The higher level of deliveries of new cars was attributable to Sweden, Norway and Luxembourg. The Car Business's **deliveries of used cars**, adjusted for acquired and divested operations, were 3 per cent lower during the quarter compared with the previous year. The lower level of deliveries of used cars was mainly attributable to Sweden.

The **order intake** for new cars, adjusted for acquired and divested operations, was 13 per cent higher during the quarter compared with the previous year. The higher underlying order intake was attributable to Sweden, Norway and Luxembourg.

The **order backlog** amounted to 11,782 cars, which was around 1,200 cars fewer than in the previous year but around 700 cars more than in December 2024. From a historical perspective, the order backlog in Sweden

and Norway remained at a low level, which was partly explained by short delivery times for cars from car manufacturers.

# **Sustainability**

Sustainability issues are becoming an increasingly integral part of the automotive industry and of our own operations. Sustainability, and the climate issue in particular, are seen as important challenges that the industry must meet in order to ensure its long-term survival. These challenges are regulated by international laws and objectives, and are also expected and demanded by business partners and customers.

### Circular business model

We help extend the life of a car through maintenance and repair at our service and damage centres. By selling used cars and offering rental cars to customers who use their cars on a limited basis, we help to maximise value, i.e. to ensure that cars are used as efficiently and for as long as possible. We contribute to viewing waste as a resource by recovering materials at our five car dismantling centres in Sweden and Norway when the car is no longer in use. The parts that are not reused in our workshops are recycled by our waste contractors. We contribute to a holistic approach by working with different partners in our value chain; including participating in research projects.

### A more sustainable value chain

Bilia is part of a value chain, and we exert an influence primarily by choosing car brands with care, but also by requiring all suppliers to follow our Supplier Code of Conduct. In our offering to customers, we contribute to a sustainable value chain for example through our circular business model, our focus on renewable energy, and our systematic work environment efforts for mental and physical health. When it comes to using a car, we work with needs analysis to find the most suitable car based on the customer's circumstances. We offer a wide range of cars with different fuels, and inform customers about the importance of service, repair and dismantling.

# **Other information**

### **Risks and opportunities**

Risks and risk takings are a natural part of Bilia's business operations. A good understanding of the risks together with an efficient way of identifying, evaluating and managing the risks are important for Bilia's short-term and long-term success. Bilia has a formal yearly process at Group level to identify, plan and reduce identified risks in the business. Please refer to the annual report for a description of the risks and Bilia's risk management.

With the exception of the current uncertainty regarding the introduction of trade tariffs between different countries, events that have transpired in the wider world since publication of the annual report are not deemed to entail any new material risks or changes in working methods compared with the description in the annual report for 2024. It is not possible to assess the impact of new trade tariffs on Bilia's future operations, but future negative impact cannot be ruled out.

### Seasonal variations and number of working days

Bilia's business and operating profit are affected by seasonal variations to a limited extent. The number of working days for the reporting periods is affected by when national holidays fall in different years. Business and operating profit in mainly the Service Business, but also the Car Business, are affected by the number of working days.

### **Related party transactions**

For a description of related party transactions, see page 90, "Note 31" of the 2024 Annual Report.

### **Parent Company**

Bilia AB is responsible for the Group's management, strategic planning, purchasing, public relations, business development, legal, marketing, HR, real estate activities, accounting and financing.

## Note 1 Accounting principles

This interim report has been prepared in accordance with International Financial Reporting Standards (IFRS) IAS 34 and applicable provisions of the Annual Accounts Act. The interim report for the Parent Company has been prepared in accordance with the Annual Accounts Act and RFR2. The same accounting policies and calculation methods have been applied for the Group and the Parent Company as in the most recent Annual Report except for rental cars and company cars leased under financial leasing agreements. These are classified as Right-of-use assets from 2025 onwards, compared to previously as Leased vehicles and Other tangible assets, respectively. The comparison periods have been restated.

IFRS 18 Presentation and Disclosure in Financial Statements replaces IAS 1 Presentation of Financial Statements for financial years beginning on or after 1 January 2027. The impact of the application of the new standard on Bilia's financial statements is currently being assessed. Otherwise, no new or amended standards that have not yet entered into force are expected to have any material effect on the Group's financial statements.

Disclosures in accordance with IAS 34, paragraph 16 A, are made not only in the financial statements and related notes, but also in other parts of this interim report.

Figures in the interim report are rounded, which is why notes and tables may not add up.

## Note 2 Financial instruments

Valuation principles and classifications of Bilia's financial instruments as described in the annual report for 2024 have been applied consistently during the reporting period.

To hedge electricity costs, Bilia has decided to use electricity derivatives to even out price variations on the electricity market. Bilia hedges gradually up to five years and builds up the volume of electricity contracts for each delivery date. The hedges meet the requirements for effectiveness, which means that the changes in value are recognised in other comprehensive income. The forward agreements used to hedge contracted purchases of electricity are classified as cash flow hedges and amounted to a liability of SEK 6 M.

Bilia's financial instruments in the form of currency derivatives are valued at fair value over the statement of income and are valued according to valuation level 2. The value of the currency derivatives was not material and did not constitute a significant item in the statement of financial position for the Group. Valuation of the currency derivatives at fair value has resulted in an income of SEK 2 M, which was matched by a cost for the revaluation of assets in foreign currency. The effect on the Group's result was therefore SEK 0 M.

Bilia's financial instruments valued at fair value over equity consist of put/call options issued in connection with acquisitions and are valued at fair value based on future exercise price according to valuation level 3. The option is reported as provisions in the statement of financial position and amounted to SEK 50 M.

## Note 3 Reconciliation of operational earnings with operating profit
