
Key personnel subscribe to incentive stock options

Following the decision at the general meeting on May 23, 2024, Freemelt has established a long-term incentive program by issuing so-called incentive stock options "Incitamentsprogram USA 2024 /2028". Key personnel in the USA has subscribed to a total of 300 000 incentive stock options. The potential dilution amounts to 0.4%.

After the subscription, no further options remain in the incentive program.

The Board of Directors considers incentive programs to be advantageous for the group and the company's shareholders.

About Us

Founded in 2017 by a team of experienced engineers, Freemelt develops advanced 3D printers for metal components and is based in Gothenburg, Sweden. Freemelt primarily serves companies in the defense, energy, and medical technology sectors in Europe and the U.S., helping them innovate and improve production efficiency. Freemelt's modular printers, designed for industrial applications, support complex geometries and high-performance materials, such as tungsten for defense and energy applications and titanium for medical implants. Backed by strategic investors, Freemelt is well-positioned for continued growth as it advances into the next phase of commercialization. Read more at www.freemelt.com
