

MAGNASENSE APPOINTS VICKI JOHNSON AS INTERIM CFO

Magnasense today announced the appointment of Vicki Johnson as interim Chief Financial Officer (CFO), succeeding Christel Dahlberg, who has resigned today due to private health reasons.

Vicki Johnson brings extensive experience in finance to her new role. She holds a Master's Degree in Chemistry from Oxford University and began her career at EY LLP, where she qualified as a Chartered Accountant (CA). Vicki has held various finance roles across professional services, manufacturing, and technology sectors, with expertise in financial reporting, audit, budgeting, forecasting, tax, and treasury.

For the past five years, Vicki Johnson has been a financial consultant with CFPro Limited (now part of BKL) in the UK, providing CFO services to a FTSE AIM-listed manufacturing company and a privately owned technology company.

"We are grateful to Christel Dahlberg for her contributions to Magnasense and wish her the best," said CEO Marco Witteveen. "We are confident that Vicki Johnson's leadership will guide Magnasense through this transition and advance our financial strategy."

"I am honored to step into the role of interim CFO at Magnasense," said Vicki Johnson. "I look forward to working with the executive team to drive our strategic goals and contribute to our future success."

Vicki Johnson has been appointed interim CFO starting immediately, while the recruitment of a new CFO is ongoing. The board and executive team are committed to ensuring a smooth transition and continued excellence in financial management.

About Magnasense AB

Magnasense is a Swedish diagnostics company founded in 2019 to offer tests to monitor and optimize the dosage of biological drugs via its unique patented technology platform. In June 2020, Magnasense was listed on the Nasdaq First North Growth Market. The company's ambition is, in addition to bringing innovative diagnostic technology to the market, to make diagnostics more accessible, easier to use and to provide accurate and easily transferable results.
