Instalco signs new agreement for scaffolding

The Instalco company, Enter Ställningar AB, has signed a contract with Södra Cell for scaffolding at the Mörrum pulp mill, just outside of Karlshamn. The scaffolding will be set up so that Södra Cell is able to complete installations and service work at the mill. The order value for Instalco is approximately SEK 40 million.

“We have been successfully collaborating with Södra Cell for quite some time elsewhere, such as the Värö pulp mill. We are proud to have won their confidence by expanding the collaboration now to the Mörrum mill. This assignment also expands our operations in the southeastern part of Sweden,” says Lembit Laks, CEO at Enter Ställningar.

Södra Cell's mill at Mörrum is a specialized pulp mill that produces premium paper pulp and dissolving pulp for textiles.

It will get underway immediately with a large amount of scaffolding that will be set up over a short period of time.

Enter Ställningar has a full service offering in construction and industrial scaffolding. The company's offering includes drawings, calculations, assembly, and leasing of scaffolding.
