

Klimator and AiDEN Auto demonstrate driver alerts related to weather and road weather conditions

AiDEN Auto creators of the first white label and bi-directional connected services hub powered by the Android Automotive Operating System (AAOS) and Klimator, world-leading experts in road weather intelligence, will be showcasing a new collaboration during the Connected Vehicle Systems Alliance (COVESA) All Member Meeting in Gothenburg, April 16 – 18. The Demonstration will include Klimator weather alerts in multiple AiDEN-enabled passenger and commercial vehicles.

"AiDEN's Services Hub was launched to enable OEMs to rapidly introduce innovative connected vehicle experiences that their customers would benefit from and showcasing weather safety use cases with Klimator demonstrates the flexibility of our platform." Says Todd Thomas, Chief Revenue Officer at AiDEN Auto.

"Our advanced technology is designed to assist and minimize risks associated with road and weather conditions. Together with AiDEN Auto, we provide road weather intelligence as proactive information to the driver seamlessly. We are very excited about this demonstration as it shows the value that we bring to the market." Says Viktoria Bogren, Head of Business Area Automotive at Klimator.

About AiDEN Auto

Imagine a world where your vehicle anticipates your every need, delivering tailored services to you in an instant. Experience the seamless integration of third-party digital services directly into your vehicle, elevating your driving experience to new heights. With AiDEN, the ultimate in-car convenience is at your fingertips.

About Klimator

Klimator AB is a publicly listed software company with over 30 years of research in applied road climatology. Klimator has two innovations – the data platform Road Condition Data (RCD), providing predictive high precision road weather information, and the sensor fusion solution AHEAD providing real-time detective road weather information. With these innovations, Klimator provides precise and reliable road weather information to the winter maintenance and the automotive industries creating safer roads and enabling scalable autonomous driving (AD) and intelligent driver support systems (ADAS). In 2020, Klimator acquired HedeDanmark's business operations within connected sensors to broaden and strengthen Klimator's product portfolio.
