

BeammWave's Successful Debut at MWC – A Breakthrough Week in Barcelona

Exhilarating, exhausting, and truly groundbreaking – that's how we sum up our first time exhibiting at MWC Barcelona. This is the event where the mobile industry converges, where game-changing ideas take flight, and where the biggest players dominate the show floor with booths the size of small cities.

For BeammWave, this was our first time exhibiting – and it couldn't have gone smoother. Thanks to the European Innovation Council (EIC), we were one of 15 carefully selected European startups given an excellent booth with premium meeting facilities, right at the heart of the action.

Over four intense days, we engaged in both planned and unexpected meetings with:

- The largest mobile operators from Asia and the US
- Journalists and analysts eager to explore our technology
- Existing customers and new customers including some of our "dream" targets
- Investors
- The Indian Minister of Communications
- Engineers, innovators, and tech visionaries discussing new applications for our solution

What do we bring home?

Besides the two companies visiting us in Lund today, we leave Barcelona with:

- New prospects ready for deeper discussions
- A long list of follow-ups and actions
- Clear confirmation that analog beamforming is falling short

In other words, we've propelled key discussions forward, with some taking giant leaps. The impact of these conversations will unfold over the coming months—stay tuned!
