Maven Wireless secures two year extension contract with Rhomberg for SBB.

Maven Wireless has secured a two-year extension of its existing SBB agreement with Rhomberg Sersa Rail AG signed 2022. Value is estimated up to EUR 4 million over two years and the contract ensures the continued delivery of radio coverage equipment and software, including critical communications (Tetrapol/GSM-R/FRMCS1900) and advanced 5G rail tunnel coverage solutions for the Swiss Mobile Network Operators.

The renewal builds on the 5-year track record of delivering market-leading indoor and tunnel coverage systems under the original agreement.

“This extension validates the strength of our partnership with Rhomberg Sersa Rail Group and valued customer SBB,” says Anders Olin, CEO of Maven Wireless. “We look forward to deepening our technical collaboration and introducing our next-generation 5G product family in the rest of Switzerland, to support their evolving network infrastructure and meeting SBBs digitalisation and sustainability targets.

Mr. Stefano Cheli, Deputy Managing Director, Rhomberg Sersa Rail AG, comments : " We are pleased to extend our successful partnership with Maven Wireless. This agreement reflects the mutual trust and strong collaboration established over the past years. Together, we remain committed to delivering reliable, innovative, and future-proof communication solutions that support the ongoing modernization of Switzerland's railway infrastructure.
