

Boozt

The Nordic
Department Store

Investor presentation Q4 2022

Key highlights – Q4 2022

- The Nordic Department Store delivered a significant outperformance of the market and closest peers leading to accelerated market share gains
- High promotional activity impacting gross margin – largely driven by elevated inventory levels throughout the industry and continued pressure on consumers disposable income
- Average order value at a historic high mainly driven by more items per basket and supported by additional migration of customers to multi-category buyers
- Return rates on par with last year driven by momentum of adjacent categories and further development of our Fair-Use strategy
- Successfully managed to deliver a healthy and improved inventory position at year end, despite lower-than-expected market growth in 2022
- Boozt is leaving 2022 in a stronger position both commercially and financially

Group

The Nordic Department store – unprecedented volatility displayed in historical cohort's performance during 2022

Outlook 2023

- The net revenue growth is supported by market share gains, continued online penetration and a stable or improving consumer confidence compared to the historic low of 2022
- The priority is a continued high investment in growth as well as a further strengthening of the customer experience, while maintaining solid and best-in-industry profitability
 - Adjusted EBIT outlook for 2023 is positively impacted by a reassessment of the useful lives of the Group's fixed assets that mainly relates to the AutoStore installations
 - The reassessment is carried out to reflect market practice and to ensure comparability of EBIT to industry peers
 - Positive impact on yearly depreciations on a like-for-like basis in the level SEK 25 million compared to 2022
- The Group expects a modest level of investments in fixed and intangible assets during the year with CAPEX between SEK 150-200 million

The Group expects a net revenue growth

between 5% and 15%

Due to the volatile and unpredictable markets, the outlook for 2023 is more uncertain than normally. Consequently, the Group has widened the range for both net revenue growth and adjusted EBIT.

The adjusted EBIT is expected to be

between SEK 275-375 million

implied adjusted EBIT margin of 4.4% (midpoint)

The outlook assumes exchange rates will remain at current levels.
