OPERATIONAL LEVERAGE DRIVES SUBSTANTIAL EARNINGS EXPANSION

Value has been created by widening the gap between revenue and cost per member over time

- Demonstrating **operational leverage in practice**, with EBIT per member up 110%
- With a **high share of semi-fixed costs** in the model, incremental members and activity translate directly into EBIT as cost per member declines with scale
- This is not only about membership volume growth, but equally about **earnings generated per member**, driven by product improvement and member engagement
- There is **still significant upside** ahead from increasing member volume in current network and revenue per member from improved membership yield and ancillary revenues

SOLID MEMBER GROWTH, WITH YEAR-ON-YEAR IMPACTED BY CAMPAIGN AND TIMING EFFECTS

TOTAL MEMBERS

'000

NET GROWTH

'000

MEMBERS PER SQM

- Net member growth remains strong for the season and in line with historical trends, with year-on-year comparison impacted by exceptionally strong intake from the 30-year anniversary campaign in Q1 2025
- Timing effects from prior year campaigns will shift part of the expected churn from Q1 into Q2
- VAT-related pricing adjustments in Denmark have impacted volume growth, but less than initially expected
- Portfolio effects: One club closure vs. one opening in the same period last year

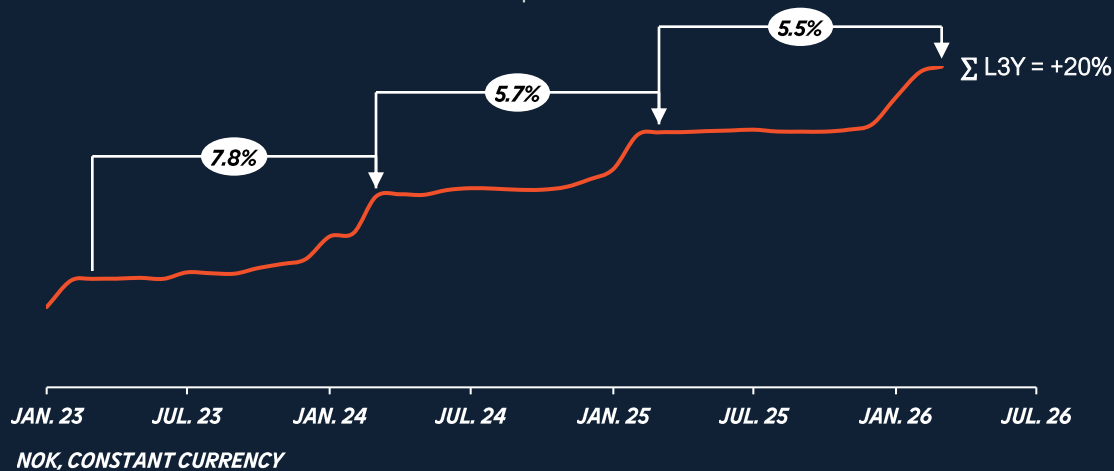

CONTRACTUAL MEMBERSHIP PRICE IS INCREASING STEADILY, WHILE REPORTED YIELD REFLECTS TIMING AND CAMPAIGNS

CONTRACTUAL PRICE

LIST PRICE LESS DISCOUNT
Basis for all price adjustments

DRIVERS FOR PRICE INCREASES, LEADING TO STEADY UNDERLYING PRICE GROWTH

- List price increases:** Above inflation across the membership product portfolio
- Inflation adjustments:** Annual CPI-based adjustments implemented January 2026 (CPIs +0-3%)
- Minimum price adjustments:** Price increases for members with the highest deviation from the list price with effect as of February 2026
- Membership mix:** Product development is making add-on products, such as group training, more attractive.
Important discounted groups, like students, seniors and corporate members, continue to grow, affecting the average contractual price

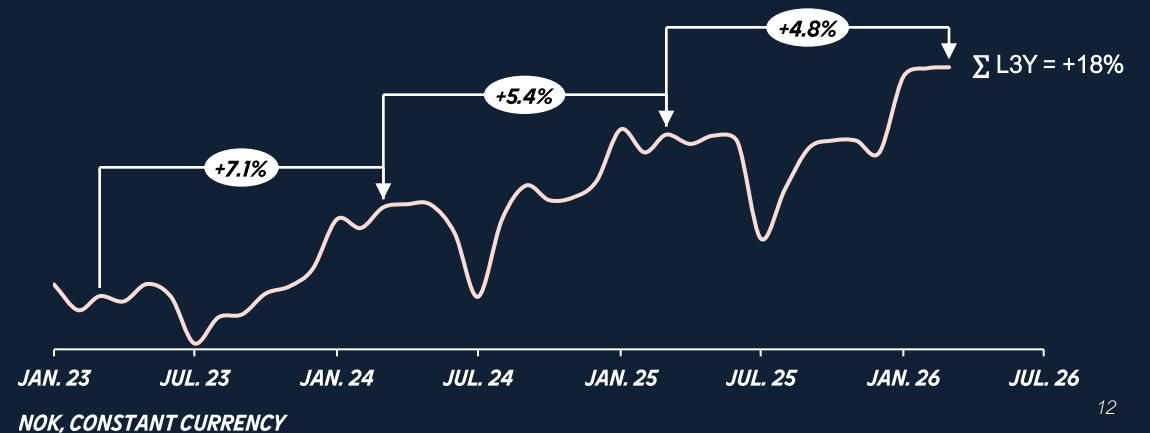

YIELD

CONTRACTUAL PRICE ADJUSTED FOR CAMPAIGN AND FREEZE EFFECTS
Realized revenue per member

YIELD DIFFERS FROM CONTRACTUAL PRICE, AND REFLECTS ACTIVITY AND TIMING, NOT UNDERLYING PRICE DEVELOPMENT QUARTER OVER QUARTER

- Campaign intensity:** Free periods and promotions temporarily dilute yield
- Freeze:** Paused memberships temporarily reduce revenue per member
- Timing effects:** Price increases phase into revenue over time

- Adjusted for these effects, underlying club OPEX growth was ~2.7%
- Excluding higher energy costs, underlying growth was ~1.8%
- Direct costs (COGS) remained broadly stable

We apply **discipline to both OPEX and CAPEX**, balancing cost control with growth investments. We target a club expansion of 8-12 new clubs per year, but with emphasis on quality over quantity
