Fasadgruppen to install claddings and roofing on new cogeneration plant in Sweden

Fasadgruppen's subsidiary Rovakate has signed a contract with Sumitomo SHI FW Energia Oy for the delivery and installation of claddings and roofing to Jämtkraft's new cogeneration plant in Lugnvik outside Östersund in Sweden. The work will be carried out between September 2023 and June 2024.

Rovakate specialises in façade and roofing works for industrial buildings and power plants in particular. Jämtkraft's new cogeneration plant will use biomass as fuel and contribute to an increased production of renewable electricity as one third of the energy production of the plant will become electricity and two thirds district heating.

Peter Polland, Business Area Manager Fasadgruppen NorthEast said: "We are happy to support Sumitomo and Jämtkraft in this exciting and important project. A majority of Fasadgruppen's subsidiaries are focused on energy efficiency measures, but with Rovakate we also get exposure to the power generation market. As a leader in its niche, Rovakate is well positioned as many European countries are looking to reinforce their energy supply with new plants."
