

Gapwaves awarded funding by Vinnova for 6G research project

Gothenburg, May 29, 2024: Gapwaves has been granted funding from Vinnova for a project to develop an innovative, cost-effective, and high-performing packaged front-end chip to enable 6G wireless infrastructure at higher frequencies (140 GHz). The project will be conducted by a consortium in which Gapwaves collaborates with Gotmic AB over a period of 2 years. The total grant amount is MSEK 4, shared between the two companies.

Gapwaves R&D Director, Nils Dagås, comments: "We are very pleased that Vinnova has chosen to approve our project. The funding means that we can explore the usage of our proprietary gapwaveguide technology in semiconductor packaging to create a low-loss interface to mm-wave chips. We are happy to collaborate with Gotmic, combining our expertise in active and passive mm-wave technologies".

About Gapwaves AB (publ)

Gapwaves AB (publ) originates from research conducted at Chalmers University of Technology and was founded in 2011. Gapwaves' vision is to be the most innovative provider of mm-wave antenna systems and the preferred partner to those pioneering next generation wireless technology for a safer and more sustainable society. By leveraging the disruptive Gapwaves technology, we help pioneers in automotive and telecom to create highly efficient mm-wave antenna systems that contributes to re-defining everyday life. Gapwaves' share (GAPW B) is traded on the Nasdaq First North Growth Market Stockholm with G&W Fondkommission as certified adviser.
