

TTP EVOLVES MICROFLEX TECHNOLOGY

Japan has 125 million inhabitants and is one of the world's largest markets for pharmaceuticals and diagnostic tests. TTP (The Technology Partnership) recently participated in the Japanese congress JACLaS (The Japanese Association of Clinical Laboratory Systems) where they showcased a concept of the POC systems MicroFlex and ecoFlex which were received with great interest. Read more about ecoFlex and TTP's progress in the attached link:

About Us

Prolight Diagnostics AB develops innovative Point-of-Care (POC) systems. These are small, portable instruments and disposable cartridges for performing in-vitro diagnostic (IVD) tests from a drop of blood.

We want to offer the foremost POC systems on the market for quick, reliable diagnosis of acute events. Our launch product will be for the measurement of troponin, to aid in the rule-in and rule-out of myocardial infarction.

The company's share is traded on the NGM Nordic SME marketplace, under the ticker PRLD.
