

Moving closer to market launch - positive feedback from regulatory authorities in China

On the 18th of November, Intellego announced an expanded collaboration with Likang for the Chinese disinfection market. Since then, Intellego and Likang have met with regulatory authorities such as China's equivalent to the CDC (Centers for Disease Control and Prevention), infection control experts, and key opinion leaders, who all have given positive feedback. This further confirms that the product launch in China is expected to take place at the end of 2025, with full completion of the compliance process at that time, if not earlier.

About Us

Intellego Technologies develops and manufactures color indicators that show the effect of irradiation with, among other things, invisible ultraviolet light, UV light. Color indicators are used globally in, for example, the disinfection industry, the sunscreen industry, and the manufacturing industry. Intellego's indicators have been developed from the company's patented photochromic ink, which can be adapted to different wavelengths of light and various application areas across a range of different industries. Intellego Technologies was founded in 2011, is headquartered in Stockholm, and is listed on the Nasdaq First North Growth Market.

The company's Certified Adviser on the Nasdaq First North Growth Market Stockholm is Mangold Fondkommission AB.
