# CAVENDISH HYDROGEN SECURES CONTRACT FOR PUBLIC HYDROGEN FUELING STATION IN POLAND

**(November 17, 2026 - Oslo, Norway) Cavendish Hydrogen ASA (Cavendish, the Company, Oslo Børs ticker: CAVEN) is pleased to announce the signing of a contract with a new customer in Poland for the delivery of a new public hydrogen fueling station, further supporting the development of hydrogen mobility infrastructure in Central Europe.**

The station will operate at both 350 bar and 700 bar fueling pressure, providing a versatile fueling solution capable of serving a broad range of vehicles and applications. Designed with a daily dispensing capacity of 1,200 kg of hydrogen, the station will be one of the largest publicly accessible hydrogen fueling facilities in the region. In addition, the facility will be equipped to fill hydrogen transport trailers, supporting both mobility and hydrogen distribution needs.

The contract value is approximately EUR 2.5 million and includes equipment, installation and commissioning. Delivery will take place within the coming months, and revenue recognition will follow during the first half of 2027.

CEO of Cavendish Hydrogen, Robert Borin commented:
"We are proud to support our new customer in establishing a modern hydrogen fueling hub in Poland. This project demonstrates the growing demand for high-capacity hydrogen infrastructure capable of serving multiple market segments. By combining public accessibility, support for heavy-duty transportation, agricultural applications, and trailer filling capabilities, this station represents an important step in the continued development of Poland's hydrogen economy."

The customer’s investment reflects the increasing momentum of hydrogen adoption across Poland as public authorities, transport operators, logistics companies, and industrial users seek sustainable alternatives to conventional fuels.

The project further strengthens Cavendish Hydrogen's position in the Polish market, where the company has already delivered multiple hydrogen fueling stations and continues to support the country's ambitions for low-emission transportation and energy transition.
