

Elliptic Labs Shipping on HONOR X7c, HONOR 300 Series, and HONOR GT Smartphones

Oslo, Norway — [Elliptic Labs](#) (OSE: [ELABS](#)), a global AI software company and the world leader in AI Virtual Smart Sensors™ currently deployed in over 500 million devices, is shipping its AI Virtual Proximity Sensor™ INNER BEAUTY® on the latest HONOR smartphone launches. The HONOR X7c has been launched for the global market and utilizes Elliptic Labs' [partner Qualcomm's Snapdragon 685 chipset](#). The HONOR 300 Series and HONOR GT, all targeted for the China market, are also utilizing Qualcomm's Snapdragon SOCs. The HONOR 300 is powered by the [Snapdragon 7 Gen 3](#) chipset while the HONOR 300 Pro, 300 Ultra, and HONOR GT have the [flagship Snapdragon 8s Gen 3](#) at their core. Elliptic Labs signed the [contract for this shipment in March 2024](#).

“The HONOR X7c, 300 Series, and HONOR GT smartphones are the latest examples of how our relationship with HONOR and the biggest global OEMs are benefitting from the network effects our AI Virtual Smart Sensor Platform™ generates,” stated Laila Danielsen, CEO of Elliptic Labs. “By leveraging our full stack expertise, technological leadership in AI and seamless device-to-device interoperability, we enable leading OEMs like HONOR to deliver groundbreaking innovation like Contextual Intelligence. This collaboration has empowered HONOR to create an ecosystem of devices that are greener, smarter, and more user-friendly.”

AI Virtual Proximity Sensor INNER BEAUTY

Elliptic Labs' AI Virtual Proximity Sensor detects when a user holds their phone up to their ear during a call, allowing the smartphone to turn off its display and disable its screen's touch functionality. This keeps the user's ear or cheek from triggering unwanted actions during the call, such as hanging up or dialing numbers. Turning off the screen also helps conserve battery life.

Proximity detection is a core capability that is used in all smartphones, but Elliptic Labs' AI Virtual Proximity Sensor is a unique, software-only solution that delivers robust proximity detection without the need for a dedicated hardware sensor. By replacing hardware sensors with software sensors, the AI Virtual Proximity Sensor reduces device cost and eliminates sourcing risk.

About Elliptic Labs

Elliptic Labs' AI Virtual Smart Sensor Platform™ brings contextual intelligence to devices, enhancing user experiences. Our technology uses proprietary deep neural networks to create AI-powered Virtual Smart Sensors that improve personalization, privacy, and productivity.

Currently deployed in over 500 million devices, our platform works across all devices, operating systems, platforms, and applications. By utilizing system-level telemetry data to cloud-based Large Language Models (LLMs), the AI Virtual Smart Sensor Platform delivers the unrivaled capability to utilize output data from every available data source. This approach allows devices to better understand and respond to their environment, making technology more intuitive and user-friendly. At Elliptic Labs, we're not just adapting to the future of technology – we're actively shaping it. Our goal is to continue pushing the boundaries of contextual intelligence, creating more intuitive and powerful experiences for users worldwide.

Elliptic Labs is headquartered in Norway with presence in the USA, China, South-Korea, Taiwan, and Japan. The company is listed on the Oslo Stock Exchange. Its technology and IP are developed in Norway and are solely owned by the company.

Trademark

INNER BEAUTY is a registered trademark of Elliptic Labs.

AI Virtual Smart Sensor, AI Virtual Smart Sensor Platform, AI Virtual Proximity Sensor, AI Virtual Presence Sensor, AI Virtual Connection Sensor, AI Virtual Gesture Sensor, AI Virtual Heartbeat Sensor, and AI Virtual Breathing Sensor are trademarks of Elliptic Labs.

All other trademarks or service markets are the responsibility of their respective organizations.
