

DOKTOR.SE ACQUIRES PRIMARY CARE CLINIC IN HELSINGBORG

Doktor.se has acquired Garnisonsgatans Läkargrupp and its associated primary care clinic in Helsingborg. Through the acquisition, Doktor.se strengthens its offer of accessible, high-quality care for our patients in Skåne and the surrounding area.

- When Doktor.se now establishes a primary care clinic in Helsingborg, it gives our patients an increased high-quality medical care offer with good accessibility and security. We look forward to taking part of the expertise available at Garnisonsgatans Läkargrupp and together continue to develop the operations., says Eric Teder, Country Manager Sweden at Doktor.se.

Doktor.se's Garnisonsgatan primary care clinic will continue to offer good quality and close care with experienced, competent, and committed employees. The focus is on safety and accessibility through person-centred care.

- Garnisonsgatans Läkargrupp has since the start strived to offer care with high medical quality and security for our patients. Doktor.se will contribute with unique knowledge and valuable experiences. This is especially true of the possibility of combining physical and digital care to provide our patients with more accessible care., says Ismena Alagic, Operations Manager at Garnisonsgatans Läkargrupp.

Doktor.se is constantly working to refine our services and provide good accessibility for our patients. The acquisition of Garnisonsgatans Läkargrupp therefore contributes in a valuable way in the continued development of digiphsical care at the forefront.

About Doktor.se

Doktor.se was founded in 2016 and is one of Sweden's largest company in digiphsical care with over 1 million users of the Doktor.se-app. Doktor.se owns 15 physical health centres in Sweden with approximately 160,000 listed patients. Every day, our employees go to work with the ambition to streamline and create better accessibility in Swedish healthcare.

About Garnisonsgatans Läkargrupp

Garnisonsgatans Läkargrupp has been conducting primary care since 2018 on behalf of Region Skåne. The key words are accessibility, continuity, and quality. All 23 employees in the operations have many years of experience in primary care. The number of patients listed are approximately 8,400 individuals.
