

BIMObject AB Announces CEO Transition

BIMObject AB today announces that Martin Lindh has stepped down as CEO, effective 11 March 2025. With the strategic repositioning of the company, the Board and Martin have mutually decided to part ways. The Board of Directors sincerely thanks Martin for contributions to the company and wishes him well in his future endeavors.

Sofia Hylén (previously Sundbom), Chief People Officer of BIMObject since 2021, will serve as Interim CEO while the Board conducts a search for a new CEO to lead the company through its next phase of growth.

"It has been an incredible journey leading BIMObject, and I am immensely proud of what we as a team have accomplished during this period, including a full strategic repositioning of the company and launch of new products with proven unit economics along with a share price increase of +250%. Through our dedicated work we have gradually built a strong foundation for the company to grow from. I have full confidence in BIMObject's continued success and look forward to seeing the company thrive in its next chapter", says Martin Lindh.

Pia Engholm, Chairperson of the Board in BIMObject AB, states:

"On behalf of the Board, I extend our deepest gratitude to Martin for his dedication and commitment during his time with BIMObject. He played a key role in improving financial stability, brought in capabilities within sustainability through the acquisition and migration of CarbonZero, and was instrumental in laying the groundwork for our new growth strategy. As BIMObject embarks on a new chapter of growth, focused on scaling our Platform-as-a-Service solution and expanding our global reach, the Board is committed to finding the next leader to guide the company towards continued success."

The search for a new CEO will commence immediately.

About BIMObject

Connecting the People Who Build and the Products They Build With

Bim.com is the central source of product information for the construction industry and the engine behind an ecosystem of software, tools, and services that enable those who build to use the information at different stages of a construction project.
