

Diadrom secures extension and expansion of project – order worth 12 MSEK annually

Diadrom Systems AB, a wholly owned subsidiary of Diadrom Holding AB (publ), is a leading software company offering services and proprietary products in Autotech diagnostics. The company has secured a significant order worth SEK 12 million annually from a leading Swedish passenger car manufacturer.

The order includes a dedicated team of eight experts who will focus on system-level testing and software downloading for the vehicle architecture of the Swedish car manufacturer.

This is an extension and expansion of an ongoing project that has now grown in scope thanks to successful results and increased trust from the customer. The agreement represents an approximate 50% increase compared to the previous project scope, further underscoring the enhanced confidence in Diadrom's expertise and its ability to deliver high-quality services.

The project marks yet another milestone for Diadrom in the development and diagnostics of advanced Autotech solutions, where we continue to provide high-quality services and innovative products to our customers.

"This extension and expansion of the project is a clear acknowledgment of our team's competence and ability to create value for our customers. We are delighted to see the project grow and to continue our collaboration with one of Sweden's leading car manufacturers. This strengthens our position as a trusted partner in diagnostics and software testing within the automotive industry," says CEO Viktor Eliasson.
