

SenzaGen receives SEK 0.7m order for GARD®skin from one of the world's largest pharmaceuticals companies

Lund, August 24, 2021

SenzaGen has been selected to test substances from a leading global pharmaceuticals company. Valued at SEK 0.7 million, the project involves testing using SenzaGen's non-animal skin sensitization test, GARD®skin. The testing will be performed at SenzaGen's GLP-certified laboratory in Lund, Sweden.

The pharmaceuticals company, which is one of the largest in the world, has global operations with a uniquely wide range of treatment areas. With GARD®skin, the company aims to determine whether new development candidates can cause allergic reactions on the skin.

"We are delighted that one of the largest pharmaceutical companies in the world has chosen to partner with SenzaGen and has decided to test substances with GARD®skin, which once again validates the value of GARD®skin internationally. Our test method provides them with fast and reliable results, making it possible to ensure that their substances cannot cause skin allergies already during the development phase. This project serves as further proof that our innovative technology is highly interesting to leading companies in the pharmaceuticals industry. With this new key order, we are continuing to expand our customer base, adding another world leader to our ranks," says Peter Nählstedt, CEO of SenzaGen.

SenzaGen's GARD® test platform is designed for companies looking to improve their testing strategy and enhance the accuracy of their test results while avoiding animal testing.

About us

SenzaGen is a Swedish biotech company that provides state-of-the-art non-animal tests for assessing a substance's allergenicity. The GARD® test method combines genomic data from human cells with machine learning for a unique capability to identify and analyze whether a chemical could cause allergic reactions on the skin or in the respiratory tract. With excellent predictivity, GARD® meets needs in several industries and helps companies develop, produce and deliver safer, ethical and more sustainable products. GARD® tests are performed in SenzaGen's GLP-approved lab and by select partners in Europe and the US. SenzaGen has its headquarters in Lund, Sweden and a subsidiary in the US. For more information, please visit: www.senzagen.com.

SenzaGen is listed on Nasdaq Stockholm First North (ticker: SENZA), and FNCA Sweden AB, +46(0)8-528 00 399, info@fnca.se, is the company's Certified Adviser.
