

## NEP Connect selects Net Insight for extension of Football stadium media network

**Stockholm, Sweden – NEP Connect has selected Net Insight’s media transport solutions for a new live sports contribution network in the UK.**

NEP Connect, an NEP Broadcast Services Company, is a leading provider of global critical connectivity services. The company is extending their Nimbra-based contribution network, called Anylive®, throughout the UK from Premier League stadiums to now include all 72 English Football League (EFL) venues. NEP Connect’s Anylive network now covers the top four football divisions in England and also connects major sports, music and entertainment venues including Wembley and The O2.

The Anylive® media network is based on Net Insight’s Nimbra MSR platform, which is placed at all stadiums for assured transmission with 100% Quality of Service. In the Championship League, the new Media Acceleration Module is used to provide high-quality low-latency JPEG2000 encoding for Remote Production. And at some stadiums the MSR is combined with Nimbra VA for MPEG4 encoding. NEP Connect will also deploy the new terabit capacity Nimbra 1060 at the core of its network. The robust, high bandwidth Anylive connectivity at the 72 venues will bring live coverage to millions of viewers.

David Meynell, Managing Director at NEP Connect explains, “We have an excellent relationship with Net Insight at all levels in the NEP Connect business and they are a trusted partner of ours. The support from Net Insight has allowed us to increase our Anylive network by a further 72 venues and enabled a phased transition to centralised production.”

“The operational efficiency and ease of use is why our customers continue to build their critical IP network expansions for the future,” says Henrik Sund, CEO of Net Insight. “It is great that we can support NEP Connect to extend their capabilities with a wide range of IP solutions.”

The order was won and delivered in Q2.

### About NEP Connect

NEP Connect, an NEP Broadcast Services Company, has been delivering critical media content since 1989. The company's rapidly growing international fibre network, Anylive®, connects over 220+ locations including broadcasters, major switching centres, channel aggregators, sports and entertainment venues. NEP Connect operates two Network Operation Centres located in the UK, co-located with NEP Connect teleports, which supply extensive satellite facilities to complete the connectivity offering. The company provides a full range of broadcast services from UHD to low bit rate streaming with data and audio transmission services also available. This comprehensive fibre and satellite infrastructure forms a cohesive and robust portfolio, broadcasting over 200 hours of live transmissions worldwide every day supporting multiple contracted and occasional use events.
