

NOSA signs agreement with Galls and launches NOSA Odor Control in the U.S.

Nosa Plugs AB (publ) ("NOSA" or the "Company") has entered into a distribution agreement with U.S.-based Galls, LLC, for the sale of NOSA Odor Control in the United States. The agreement has been entered into through NOSA's U.S. subsidiary, NoseOption Inc. Galls will place an initial order in connection with the signing of the agreement.

Galls is a U.S. distributor of equipment and workwear for professionals in sectors including law enforcement, fire and rescue services, emergency medical services, security and corrections. The company has been operating for more than 50 years, and over one million customers use its products on an ongoing basis.

Through this partnership, NOSA gains access to Galls' established sales channels and customer base in the U.S. market for public safety and first responders.

"Galls has a strong presence among professionals for whom exposure to unpleasant odours can be part of everyday working life. The partnership gives us an established channel through which to further expand our presence in the U.S. market and represents an important step in our growth journey," says Adrian Liljefors, CEO of Nosa Plugs AB.

An initial order is expected to be placed in connection with the signing of the agreement and will be delivered through NOSA's U.S. subsidiary, NoseOption Inc.
