

## Scila strengthens leadership team to support expansion in energy and commodities

**Long-standing experts appointed to key roles following a doubling of the company's energy client base**

**STOCKHOLM – 27 February 2026** – Scila, a leading global provider of market surveillance and risk management solutions, today announced a strategic strengthening of its organization through the appointment of two long-standing experts to key leadership roles. Lisa Jonsson has been named Head of Customer Success, and Mattias Wallman assumes the role of Principal Engineer, Energy and Commodities.

These appointments reflect Scila's commitment to scaling its operations while maintaining the high delivery quality that has defined the company's recent success, particularly within the rapidly expanding energy and commodities sector.

*"To support our significant growth and ensure scalability without compromising on the quality our clients expect, we are formalizing these leadership positions," says Mikko Andersson, CEO of Scila. "Lisa and Mattias embody decades of combined experience and a level of industry-specific insight that is truly unmatched. Their deep understanding of our clients' unique challenges, especially in the complex energy and commodities markets, is a cornerstone of our competitive advantage."*

*"Jointly, they have successfully spearheaded more than 50 major client deployments over the years," Andersson continues. "This proven track record ensures that our incoming clients will benefit from the same unparalleled domain expertise that has defined our success to date. As we continue to mature as an organization, their leadership and skills in fostering effective customer relations will be pivotal in our journey forward."*

In her new role, Lisa Jonsson will lead and coordinate trade surveillance customer projects, with a primary focus on the energy and commodities segment. Having been a key driver in Scila's project management for many years, her role is now clarified to further enhance knowledge sharing and best practices across the organization. Her focus is to ensure that every Scila client experiences a seamless journey from implementation to long-term success.

As Principal Engineer, Mattias Wallman will provide high-level technical leadership and advisory for surveillance projects within the energy and commodities markets. Drawing on his extensive technical background and years of experience at Scila, Mattias will ensure that customer deployments are executed according to industry best practices, helping clients navigate evolving regulatory landscapes such as REMIT II with robust and scalable technology.

These appointments come at a time of significant momentum for Scila. Over the past 18 months, the company has doubled its client base within the energy segment, a trajectory fueled by a global demand for sophisticated surveillance tools and a strong performance in

the second half of 2025. By formalizing the roles of domain experts like Jonsson and Wallman, Scila reinforces its position as a partner that not only provides world-class technology but also possesses the deep industry knowledge required to solve the most complex market challenges.

This organizational update is part of a broader initiative to build a robust, scalable foundation for Scila's continued global expansion. The company has during the last year made several key recruitments in strategic areas, including Data Science and AI, finance, as well as within marketing and sales. These investments signal Scila's ambition to build a deeper, more mature organization ready to capitalize on future growth opportunities.
