

TH1NG is featured in American industry magazine

RFID Journal, the world's leading source of RFID news and insights, which helps companies use RFID and other IoT technologies to improve the way they do business, features TH1NG and their IoT platform, IoT Open, in a news report.

The report focuses on TH1NG and its contract with Jönköping County, where TH1NG delivers a comprehensive horizontal IoT platform. The contract was entered in the end of 2022, and TH1NG received the certification as an approved supplier of a county-wide IoT platform in October 2023.

- RFID Journal discovered TH1NG, found us interesting, and decided to write a news report. This confirms that we are on the right path with our business and successfully reaching out. RFID Journal was particularly interested in the IoT platform contract with Jönköping County, covering 55 organizations, which is unique in its kind. And we aim to promote this Swedish concept internationally, as part of our collective effort towards a smart and sustainable society, says Klas Westholm, CEO of TH1NG.
