

PRESS RELEASE

30 June 2026 12:30:00 CEST

TERRANET BECOMES BLINCVISION

The name change marks the next step in the company's development. With its new name, the company gains a clearer identity that better reflects its business, technology, and focus on commercializing the BlincVision sensor technology.

The name change has now been registered with the Swedish Companies Registration Office and takes effect today, 30 June 2026. The company's shares are expected to begin trading under the ticker BLINC on Nasdaq First North Growth Market as of 3 July 2026.

BlincVision's MVP has been evaluated across several markets during the first half of 2026, including the automotive and defence sectors. These evaluations have led to deeper discussions with potential customers and partners and represent an important part of the company's commercialization journey.

"BlincVision is already an established brand for our sensor technology. Adopting the same name is a natural step that strengthens the connection between the technology and our focus on commercialization," says Torgny Hellström, Chairman of the Board.

The name change does not affect shareholders' holdings or rights.
