Stockholm, February 2023

Creturner Group AB (publ)

--

Creturner Group AB is a group with two business areas within environmental technology.

The digital part is a technical computing business that is expanding to strengthen its long-term potential and create a presence in the rapidly growing market for computing capabilities. The company has its own facilities in Sweden with in-house energy production to reduce raw material costs and environmental impact.

The environmental part offers corporate customers an efficient and permanent method to offset their operations. The method is based on Bio-CSS (Carbon Capture and Storage), which involves converting residual biomass into the element carbon and storing it to reduce the amount of CO₂ in the atmosphere. Corporate customers of Creturner can then buy carbon offsets in the same way as they traditionally offset climate change, for example by planting trees. Unlike tree planting, Creturner's approach is immediate, permanent and clearly measurable. Monitoring is done through linked smart contracts that give the customer insight into the outcome as well as future financial returns from the environmental investment.

The company is listed on NGM Nordic SME in Stockholm, Sweden and on the Stuttgart Stock Exchange in Germany.
