

## JONDETECH ENTERS GLOBAL DISTRIBUTION PARTNERSHIP WITH DIGIKEY

**JonDeTech Sensors AB (publ) ("JonDeTech" or "the Company") today announces that it has entered into a distribution agreement with DigiKey, one of the world's leading distributors of electronic components. Through this collaboration, JonDeTech's innovative sensor products will become available to DigiKey's extensive global customer base.**

Founded in 1972 and headquartered in Minnesota, USA, DigiKey is a leading player in electronic component distribution, offering a wide product range, high availability, and rapid delivery to OEMs (Original Equipment Manufacturers), ODMs (Original Design Manufacturers), wholesalers, and product companies in over 180 countries. The partnership marks an important strategic milestone for JonDeTech and strengthens the Company's international presence, while improving access to its sensor technology for customers and partners worldwide.

The partnership with DigiKey initially entails that JonDeTech's products JIRS30 and JIRS40, as well as the evaluation kits EVK-J30HF and EVK-J40CL, will be available for order through DigiKey.

"We are very pleased to initiate this collaboration with DigiKey, one of the most respected players in global electronics distribution. It is a significant step in our strategy to expand into new markets and improve international availability of our products," says Leif Borg, CEO of JonDeTech.

"We are glad to welcome JonDeTech to our global supplier network and give our customers access to its innovative, nanotechnology-based sensors," said Missy Hall, vice president of new market development at DigiKey. "Demand for ultra-thin, low-power, and cost-efficient sensing solutions in the consumer electronics and smart building segments is growing. We're confident our collaboration with JonDeTech will bring strong value through new applications and cost efficiencies, helping accelerate the transition to next-generation sensor technology."

**About JonDeTech**

JonDeTech is a provider of sensor technology. The company markets a portfolio of IR sensor elements based on proprietary nanotechnology and silicon MEMS. The nano elements are extremely thin, built on flexible plastic, and can be manufactured in high volumes at low cost, enabling a wide range of applications, such as temperature and heat flow measurements, presence detection, and gas detection.

The company is listed on NGM Nordic SME.
