Saniona acquires headquarters to secure long-term stability

Saniona (OMX: SANION), a clinical-stage biopharmaceutical company, today announces the acquisition of its current headquarters in Glostrup, Denmark. This move secures long-term operational stability, supports the company's development plans, and provides greater control over infrastructure and cost structure as the company advances treatments for neurological and psychiatric diseases.

"Securing our headquarters not only strengthens our operational base but also reflects our confidence in Saniona's future. It allows us to continue progressing our clinical programs without disruption and with greater financial flexibility. The premises are located in an area undergoing transformation into highly sought-after residential district, which positions the deal to be financially advantageous over time," said Thomas Feldthus, CEO of Saniona.

Saniona will fund the acquisition of DKK 49 million from existing cash reserves but is also evaluating alternative financing options, such as a potential sale and leaseback arrangement, to optimize capital allocation and maintain strategic agility.
