

Gubra A/S announces signing of collaboration agreement with Hemab ApS

Today, Gubra announces the signing of an agreement with Hemab concerning a peptide collaboration. Under the terms of this pre-collaboration agreement, Gubra will start working on identifying peptide modulators suitable as a treatment for certain bleeding disorders. Gubra will utilize its streaMLine peptide platform to develop a clinical candidate which will subsequently be handed over to Hemab for further development.

Under the pre-collaboration agreement, Gubra will receive a single digit DKK million payment in Q3 2023. A full collaboration agreement is being finalised and will be signed at a later stage once final terms have been agreed to. This final agreement will lay out further terms for the collaboration including further short and long term milestone payments and royalties.

"We are excited to start working on this program with Hemab. Bleeding disorders are outside of Gubra's normal metabolic disease focus, so it is a testimony that our streaMLine platform can be used to develop peptide drug candidates to a very broad range of diseases", said Henrik Blou, CEO of Gubra A/S. "Speed is of the essence for this collaboration hence we are starting up work immediately under this pre-collaboration agreement, and once a final collaboration agreement is ready it will be signed by the parties and further details of the final agreement will be disclosed."

About Gubra

Gubra, founded in 2008 in Denmark, listed on NASDAQ Copenhagen in 2023, is specialized in pre-clinical contract research services and peptide-based drug discovery within metabolic and fibrotic diseases. Gubra's activities are focused on the early stages of drug development and are organised in two business areas – CRO Services and Discovery & Partnerships (D&P). The two business areas are highly synergistic and create a unique entity capable of generating a steady cash flow from the CRO business while at the same time enjoying biotechnology upside in the form of potential development milestone payments and potential royalties from the D&P business. Gubra has approx. 200 employees and had annual revenue of approx. DKK 200 million in 2022. See www.gubra.dk for more information.

This information is information that Gubra is obliged to make public pursuant to the EU Market Abuse Regulation. The information was submitted for publication, through the agency of the contact persons set out above, at 2023-08-21 15:29 CEST.
